

Earthquake

Drop and take cover under a strong sturdy object.

Cover - your head with your hands.

Hold - on to whatever you might be underneath. If it moves, you will want to move with it.

Seek other support if you cannot find protection under something sturdy. Get next to an interior wall and make yourself as small as possible covering your head to protect yourself while the shaking is going on.

IF OUTDOORS - move quickly away from buildings, utility poles, and other structures.

If emergency help is necessary or there is damage to a building, call the Campus Police Department.

Protect yourself at all times and be prepared for after-shocks.

Evacuate damaged buildings keeping streets, fire lanes, fire hydrants, and walkways clear for emergency responders.
